Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Yasuda et al (US 6,060,403).

The present Claims generally require providing a substrate having a silicon surface thereon, performing an ion implant process implanting nitrogen atoms onto the silicon surface; and performing a thermal nitridation process forming a silicon nitride layer on the substrate.

Yasuda et al disclose a method of manufacturing a semiconductor device which comprises implanting nitrogen ions in a silicon surface at a dose and temperature as required by the present claims, and an RTN treatment which contains ammonia as required by present claims 1-3, 5 and 7-10. See Figures 16A to 16E and column 17, lines 45-60. Moreover, Yasuda et al also disclose a silicon surface within an opening as required by present Claim 4. See Figures 13A-13F. Furthermore, Yasuda et al discloses implant energies as required by present Claim 6. Therefore, Claims 1-10 are anticipated by the Yasuda et al reference.

Allowable Subject Matter

Claims 11-22 are allowed.

The cited prior art does not disclose or suggest the steps from implanting nitrogen through formation of the bottle shaped trench as required by present Claims 11-22.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander G. Ghyka whose telephone number is (571) 272-1669. The examiner can normally be reached on Monday through Thursday.
